**Subject:** Re: Einstein on Science

If you look at the you tube of steven j gould and sheldrake, gould points out that a carrot is as highly developed as a cow. so eating meat or carrots is the same :) how about trying to find points with science on which you can both agree. penicillin cured syphilis. not heres, meditation, energy work, etc . the person who discovered it was no more or less conscious than his neighbor. . but it took scientific methods to develop and save so many lives. syphilis was around for thousands of years , surrounded by conscious beings. conscious without the language of science is also conscious, but not as useful for certain things.

Yes sir! You said it when we first met  
Science is one language in consciousness  
There are other languages consciousness uses - art music poetry love delight pleasure joy and of course  
suffering as well  
Consciousness is life

there are different levels as well as different languages. of "description" and my guess is each like a genome is personal. that doesn't mean we can't agree on some levels. yes it's red, yes it weighs 10 pounds.

yes there are balls in both basketball soccer and baseball. =A0 but . .

It would be possible to describe everything scientifically, but it would make no sense; it would be without meaning, as if you described a Beethoven symphony as a variation of wave pressure.
