Good to know

The universe exists in consciousness then !

Infinite possibilities in mathematical space in human consciousness appearing as stuff as "stuff" as a perceptual experience also in human consciousness !

Amazing --we are finally in agreement !

Thanks

Wikipedia

In the theory of discrete dynamical systems, a state space is the set of values which a process can take. For example, a system in queueing theory recording the number of customers in a line would have state space {0, 1, 2, 3, ...}.

State-space representation <[https://en.wikipedia.org/wiki/State-space\\_representation](https://en.wikipedia.org/wiki/State-space_representation)> · State space (physics) <[https://en.wikipedia.org/wiki/State\\_space\\_\(physics\)](https://en.wikipedia.org/wiki/State_space_(physics))> · State space search <[https://en.wikipedia.org/wiki/State\\_space\\_search](https://en.wikipedia.org/wiki/State_space_search)>

In physics <<https://en.wikipedia.org/wiki/Physics>> , a state space is an abstract space <<https://en.wikipedia.org/wiki/Space>> in which different "positions" represent, not literal locations, but rather states <[https://en.wikipedia.org/wiki/State\\_\(disambiguation\)#Physics](https://en.wikipedia.org/wiki/State_(disambiguation)#Physics)> of some physical system. This makes it a type of phase space <[https://en.wikipedia.org/wiki/Phase\\_space](https://en.wikipedia.org/wiki/Phase_space)> .

Specifically, in quantum mechanics <[https://en.wikipedia.org/wiki/Quantum\\_mechanics](https://en.wikipedia.org/wiki/Quantum_mechanics)> a state space is a complex <[https://en.wikipedia.org/wiki/Complex\\_number](https://en.wikipedia.org/wiki/Complex_number)> Hilbert space <[https://en.wikipedia.org/wiki/Hilbert\\_space](https://en.wikipedia.org/wiki/Hilbert_space)> in which the possible instantaneous states of the system may be described by unit vectors <[https://en.wikipedia.org/wiki/Unit\\_vector](https://en.wikipedia.org/wiki/Unit_vector)> . These state vectors <[https://en.wikipedia.org/wiki/Quantum\\_state](https://en.wikipedia.org/wiki/Quantum_state)> , using Dirac's <[https://en.wikipedia.org/wiki/Paul\\_Dirac](https://en.wikipedia.org/wiki/Paul_Dirac)> bra-ket notation <[https://en.wikipedia.org/wiki/Bra%E2%80%93ket\\_notation](https://en.wikipedia.org/wiki/Bra%E2%80%93ket_notation)> , can often be treated like coordinate vectors <[https://en.wikipedia.org/wiki/Coordinate\\_vector](https://en.wikipedia.org/wiki/Coordinate_vector)> and operated on using the rules of linear algebra <[https://en.wikipedia.org/wiki/Linear\\_algebra](https://en.wikipedia.org/wiki/Linear_algebra)> . This Dirac <[https://en.wikipedia.org/wiki/Bra%E2%80%93ket\\_notation](https://en.wikipedia.org/wiki/Bra%E2%80%93ket_notation)> formalism of quantum mechanics <[https://en.wikipedia.org/wiki/Mathematical\\_formulation\\_of\\_quantum\\_mechanics](https://en.wikipedia.org/wiki/Mathematical_formulation_of_quantum_mechanics)> can replace calculation of complicated integrals <<https://en.wikipedia.org/wiki/Integrals>> with simpler vector operations.

See also[edit <[https://en.wikipedia.org/w/index.php?title=State\\_space\\_\(physics\)&action=edit&section=1](https://en.wikipedia.org/w/index.php?title=State_space_(physics)&action=edit&section=1)> ]

- \* Configuration space <[https://en.wikipedia.org/wiki/Configuration\\_space](https://en.wikipedia.org/wiki/Configuration_space)> for the space of possible positions that a physical system may attain.

In educational institutions, safe-space (or safe space), safer-space, and positive space originally were terms used to indicate that a teacher <<https://en.wikipedia.org/wiki/Teacher>> , educational institution or student body does not tolerate anti-LGBT violence <[https://en.wikipedia.org/wiki/Violence\\_against\\_LGBT\\_people](https://en.wikipedia.org/wiki/Violence_against_LGBT_people)> , harassment <<https://en.wikipedia.org/wiki/Harassment>> or hate speech <[https://en.wikipedia.org/wiki/Hate\\_speech](https://en.wikipedia.org/wiki/Hate_speech)> , thereby creating a safe <<https://en.wikipedia.org/wiki/Safety>> place for all lesbian <<https://en.wikipedia.org/wiki/Lesbian>> , gay <<https://en.wikipedia.org/wiki/Gay>> , bisexual <<https://en.wikipedia.org/wiki/Bisexual>> , and transgender <<https://en.wikipedia.org/wiki/Transgender>> students. The term safe space has been extended to refer to a space for individuals who are marginalized to come together to communicate regarding their experiences with marginalization, typically on a university campus.[2] <[https://en.wikipedia.org/wiki/Safe-space#cite\\_note-2](https://en.wikipedia.org/wiki/Safe-space#cite_note-2)> It is criticised by many[who? <[https://en.wikipedia.org/wiki/Wikipedia:Manual\\_of\\_Style/Words\\_to\\_watch#Unsupported\\_attributions](https://en.wikipedia.org/wiki/Wikipedia:Manual_of_Style/Words_to_watch#Unsupported_attributions)> ] for being contrary to freedom of speech.

Jack,

This conversation has evolved into the emotional level of a kindergarten class.

The language used indicates such.

Letting go of the need to answer every statement that may not conform to your beliefs,

and letting go of the trash talk, hard as that may be, is really needed.

Respect for others, independent of their beliefs, would be helpful.

Trash talk reduces the ability of others to hear you.

Cut down on your fights, and present them with decorum; others are more likely to hear you.

Jim

Not a double standard. It's called discernment.

It's the same reason that Sean and others are often able to refer to religion or politics on this forum without creating offense. Discernment -- a state of flow in relation to judgment.

As to your other "question" re: ontology, I think the subject of your objections has already been fully addressed and is now exhausted.
