Je=frey

Advised Future Tech of your concerns regarding down time of p=one service during install of new Microwave link.

The best they can do i=

Slide the existing T1 link down the tower on Sandia Crest a=d Ranch, reestablish service this will take two days and 4=men, cost \$6800.00, /down time 2 days </=>instead of 5 days once new lin= is installed, decommission old T1 link, down time 2-4 hrs.

jeevacation@gmail.com> wrote:

ok for sierra, but cannot have p=one disruption

Jeffrey

Future Tech are scheduled=to be on sight July 31st for the install of Microwave Link from Sandia Cre=t to Main House.

Install of Link is ex=ected to take 5 to 7 days

There have some changes to the initial design.=/div>

Due to engineering and tower owner con=erns, the existing T1 link will be decommissioned, New Antennas will be installed in place of existing.</=iv>

T1 Phone service and Data services will =se new link,

Please note during =his time Phone Services to the Ranch will be disrupted.

CenturyLi=k

There is an issue with the Fiber Ins=all on Sandia Crest.

The initial insta=l entailed laying 6-8 ft of conduit from Centurylink Demark to an Existing=Conduit owned by tower owner, Sierra Nevada Towers.

The Tower owner has indicated the existing conduit has been b=dly damaged and there will be a need to lay a new run of conduit from Dmar= to his building. (40' rigid buried and 140' above ground galvaniz=d conduit.), Sierra Nevada have indicated a Estimated Cost of \$4500.00, wi=h

work been completed by Thursday next=week

I did initial indicate to Rich, we could perform this work for \$350=.00, but after reviewing scope of work with Future Tech, I would advise Si=rra Nevada perform this work.

Centuryl=nk have indicated this could possibly delay install of Circuit

Do I have=your approval to move forward with Sierra Nevada

Regards Brice
