yes

On Wed, Jul 13, 2016 at 3:20 PM, Brice Gordon We have just received notification for 5th, Aug- Zorro Visit. Do we have your approval to move forward with Revised plan to decommission existing T1 Data and Phone Link and install new Microwave link, including phone by the 5th August.

regards Brice

Advised Future Tech of your concerns regarding down time of phone service during install of new Microwave link.

<div class="gmail\_default" style="font-size:small">The best they can do is

<div>

Slide the existing T1 link down the tower on Sandia Crest and Ranch, reestablish service this will take two days and 4 hours, cost \$6800.00, /down time 2 days instead of 5 days once new link is installed, decommission old T1 link, down time 2-4 hrs.

do you wish to proceed with this option

regards Brice

Jeffrey

Sandia Crest to Main House.  
Future Tech are scheduled to be on sight July 31st for the i=stall of Microwave Link from

Install of Link is expected to=take 5 to 7 days

There h=ve some changes to the initial design.

Due to engineering and tower owner concerns, the e=isting T1 link will be  
decommissioned,

New Antennas will be installed in place of e=isting.

T1 Phoe service and Data services will use new link,

Please note during this time Phon= Services to the Ranch will be disrupted.

CenturyLink

There is an issue with the Fiber Install on Sandia Cre=t.

The initial=install entailed laying 6-8 ft of conduit from Centurylink Demark to an  
Ex=sting Conduit owned by tower owner, Sierra Nevada Towers.

The Tower owner has indicated =he existing conduit has been badly damaged and there  
will be a need to lay=a new run of conduit from Dmark to his building. (40' rigid buried and=140' above ground  
galvanized conduit.), Sierra Nevada have indicated a=Estimated Cost of \$4500.00, with  
work been completed by Thursday next week

I did initial indicate to Rich, we co=ld perform this work for \$3500.00, but after  
reviewing scope of work with =future Tech, I would advise Sierra Nevada perform this work.

Centurylink have indicated th=s could possibly delay install of Circuit

Do I have your approval to move forward with Sierra Nevad=

Regards Brice
