Hey J= - was just starting to type this and your email arrived...coincidence or =lairvoyance?

1. Saw your spine last night. The anterior=posterior diameter of a normal lumbar spinal canal varies between 15 and 2= mm. At that one bad level in your lumbar spine, the AP diameter measured = mm = severe stenosis, not a lot of room for all the right and left lowe= lumbar nerve roots and all 10 sacral nerve roots to fit through. No surpr=se you have Neurogenic Claudication.

2. It&=39;s great you responded to Medrol. Let's see how long it lasts. Side =ffects preclude taking it regularly. It doesn't change the mechanics o= the problem: epidural compression of multiple nerve roots by bone and rel=ted hard tissues.

3. Your anatomy, failure to res=ond to more than a year of epidural injections (presumably 3 or more per y=ar) and physical therapy (presumably done daily with a proper regimen), an= >10-yr life expectancy favor surgical treatment, though I hesitate to =pine strongly because I don't have all the data. If I examined you and=found ANY myotomal weakness, dermatomal sensory loss, denervation on EMG, =r conduction abnormalities on NCS or SEP, that would reinforce my impressi=n that you need surgery. I can't opine about the type of surgery other=than to say your severe stenosis involves only one level, so you shouldn&#=9;t need anything approaching reconstructive surgery with multi-level fusi=n.

4. I'm attaching a NEJM paper you mi=ht find informative. I did a pubmed.org <<http://pubmed.org>> search and found some recent papers discussing minimally =nvasive lumbar decompression (MILD; the most recent from Iran!) and other =techniques. I think you are best served by consulting an expert spine surge=n. One of the authors of the NEJM paper is down the block at Cornell/NYH/H=S (my old training ground): [https://www.hss.edu/physicians\\_cammisa-frank.asp](https://www.hss.edu/physicians_cammisa-frank.asp) How is it possible that 2016 marks 30 yrs since being =chief Resident in Neurology there, Jeffrey?

=. I'm available most anytime today and tomorrow if you would like to c=at - <tel:310-913-7879>

Best,  
Mark

Greetin=s, Lesley!

- my permanent email address (like all H alu=s) is mtramo@=ost.harvard.edu  
<mailto:mtramo@post.harvard.edu>  
- my current active email address to which t=at email gets forwarded is mtramo@ucla.edu  
<mailto:mtramo@ucla.edu>  
- my cellphone is 310-913-7879 <tel:310-913-7879>  
<http://www.Brai=Music.org> <http://www.BrainMusic.org>

- yes, I asked JE to send me a CD w/ =RI images when we spoke Sun  
- if he is willing and they are avai=able, I would also like to review the reports/results of his  
electrophysio=logical studies, namely Nerve Conduction Studies (Electroneurography), need=e EMG (Electromyography),  
and SSEPs (Somatosensory Evoked Potentials)

- I'm also attaching a PDF of a manuscript-in-prog=ess about the neural coding of tonal  
consonance and dissonance by auditory=nerve fibers, which we discussed over the phone Sunday - the Figures at the  
end tell the computational part of the results I tried to relate verbally=- the equations and graphs communicate so much  
better!

- my mailing address for the MR images:

Dr M=rk Tramo  
The Institute for Music & Brain Science  
2=20 Lynn Road, Suite 300  
Thousand Oaks, CA 91360  
tel 805-495-6702 <tel:805-495-6702>  
fax 805-495-6195 <tel:805-495-6195>

Best,  
Mark
