Im thinking about the reality more like natures =A0 " notation " not very dissimilar to music notati=n, our eyes see, our minds if conditioned =A0 notate harmony, intensity , tempo. relationships (musical =hrase. :). family resemblance (ala wittgenstein_). the=e is no meaning separate from an individuals interpretation of=the information carried by the notation. nothing determi=istic. . highly probable yes but definite no. . I postul=te that music represents the output of the brain, best music composi=g bypasses the filter of consciousness. . mri ;s a=d fmrис are like looking at an orchestra through a plate glass=window. you can see activity in the violins or basses or=winds , but it tells little if nothing about the sound or the music or the=C2 perceived meaning, .
