ok

On Wed, May 11, 2016 at 7:17 PM, Richard Kahn [REDACTED] wrote:

i finally heard back from Hector this morning who did not have any concerns about attached quote from future tech

=e did pose a few questions (see below)

quote attached is for 104,431 (travel and lodging not included estimated at 15,000)

there is approximately 15,000-20,000 of equipment and labor that will not be needed if sandia to main house works however this will only be known after field site survey is completed

attached timeline was from 2 weeks ago which will push completion date to approximately 2nd week of July if you want to proceed i would like to begin process soon so everything is complete before your August visit

note - i also will attempt to negotiate bid once you give me direction

please advise

thank you

Sequence of Events: /span>

1. Week of 4/25=16

a. =C2◆ FT provide quote to Zorro Ranch (4/25=16)

b. ◆=A0 Zorro Ranch review quote and approve (1- days)

c. =C2◆ Future Tech to start the FCC licensin= process

◆=A0 =C2◆ ◆=A0 i. ◆=A0 Upon written approval of quote
=C2◆ ◆=A0 =C2◆ ii. Proc=ss will take 1 week to get initial channels

assigned

=C2◆ ◆=A0 =C2◆ iii. Entire licensing proc=ss will take 4-5 weeks

◆=A0 FCC provide conditional chan=el approval

=span> =C2◆ ◆=A0 =C2◆

i. =C2◆ Remaining period of time is just paperwork =process to finalize license

b. Future Tech order =equipment based off of conditional channel approval to get order in process=u>
=C2◆ ◆=A0 =C2◆ i. =C2◆ 4-6 week lead time after receipt of order

3. ◆=A0 Week of 5/9 or 5/16

a. =/span>Future Tech to conduct Field Site Survey

4. =/span>Week of 5/23

- a. <=span style="font-size:11pt;font-family:Calibri,sans-serif">Future Tech to=complete field report
- b.a. Deploy to market to in=tall solution

Please note the above is a HIGH LEVEL timeli=e to help provide an outline for the path forward.

<=u>

I hope all is well with you.=/u>

Per our discussion last week we have finalized our design for this project to support the requested 1 GBPS solution from Day 1. The incremental cost from 300 MB to 1 GB is all related to software licensing costs on this solution and is negligible to the total project. On that basis we just designed this to 1 GBPS day one.

<= class="MsoNormal">

I have=attached the link design for you and have provided a summary below.

=/span>

Within this plan we would order the required equipment (2 links + 1 spare set) and licensing (3 links) to expedite the delivery of service. If we were to try and break this into PLAN A and PLAN B it could delay things by a whole order of magnitude and increase your cost by more than the extra FCC license cost we are putting in day 1 (\$4k investment to streamline the project). By taking this approach we can speed up the deployment timeline and cover all our bases so that when we come out to do the install we have the solution in place.

1. Primary Link Design

◆=A0 Sandia Crest to Main Residence

=C2◆ ◆=A0 =C2◆ i. 11 GHz with 4' antennas

<=span style="font-style: normal; font-variant: normal; font-weight: normal; font-size: 7pt; line-height: normal; font-family: 'Times New Roman'"> =C2◆ ◆=A0 =C2◆ ii.
NOTE: If this "Primary Solution" is successful you would have 1 extra set of spare equipment (2 total), as the second link from ZDC Main to Main Residence would not be used.</=>

2. Secondary Link Design

a. Sandia Crest to ZDC

◆=A0 =C2◆ ◆=A0 i. 11 GHz with 4' antennas

b=◆=A0 ZDC Tower to Main Residence

◆=A0 =C2◆ ◆=A0 i. 11 GHz with 2' antennas

<=span style="font-style: normal; font-variant: normal; font-weight: normal; font-size: 7pt; line-height: normal; font-family: 'Times New Roman'"> =C2◆ ◆=A0 =C2◆ ii.
NOTE: if we were to go with secondary solution based upon the primary solution not working from a line of site perspective, you would have 1 set of spare equipment.

Quote Assumptions:

1. =C2◆ Travel costs – all travel costs (Flights, car rentals, hotel) to be billed back to customer at cost +15%</=>

2. Shipping costs – all shipping costs to be billed back to customer at cost +15%

3. =C2◆ Permitting – the end user will handle any necessary permits=(if required)

4. ◆=A0 Consumables – the attached quote is an estimate and will be=verified based upon site survey

<=pan>5. Site Readiness – FT assumes that the sites have tower space= cabinet space for power supplies, power available and switch/router in place to take receipt of service

Sequence of Events:

1. Week of 4/25/16
 - a. FT provide quote to Zorro Ranch (4/25/16)
 - b. ◆=A0 Zorro Ranch review quote and approve (1-2 days)
 - c. ◆=A0 Future Tech to start the FCC licensing process=>
=C2◆ ◆=A0 =C2◆ i. Upon written approval of quote=>
=C2◆ ◆=A0 =C2◆ ii. Process will take 1 week to get =initial channels assigned
=C2◆ ◆=A0 iii. Entire licensing process will take 4-5 weeks
 - d. Zorro Ranch issue PO and provide payment (1-2 days)</=pan>
2. Week of 5/2/16
 - a. FCC provide conditional channel approval
=C2◆ ◆=A0 =C2◆ i. Remaining period of time is just =aperwork process to finalize license
 - b. Future Tech order equipment based off of conditional channel approval to get order in process
=C2◆ ◆=A0 =C2◆ i. 4-6 week lead time after receipt =f order
3. =C2◆ Week of 5/9 or 5/16
 - a. Future Tech to conduct Field Site Survey
4. Week of 5/23
 - a. Future Tech to complete field report
 - b. ◆=A0 Future Tech to order consumable materials based upon field report

5. =C2♦ Week of 6/16 (Estimated based upon the above chain of events=and equipment lead time)

a. Deploy to market to install solution

Please note the above is a HIGH LEVEL timeline to help provide an outline for the path forward.
