Subject: Re: Free Growth and Other Surprises

great reading, I would only comment on the money section. it seems somewhat limited to the US system. ETFs do not work internationally. . does greece get its own= how does a brazilian convert, how does the govt account for tax. does it accept etfs from other countries. =C2 does one have to mark to market etf value at the end of year like currencies. the arbitrage between a fixed number and floating based on underlying individual components would be complex. =C2 happy to discuss further in person , phone or skype
