Subject: Re: Ed's talk at Davos

I think silly silly , his talk boils down to NO new theories. period of cognition. disease= origin of life. brain science, we dont know how a=fly works forget about a brain, . his tiling to find creative =olutions is the aspergery - here is a structure to find items outsid= of structure. . yes - phenomenology plays a role, =and yes large numbers excite an audience. but suggesting that there =re 10 to the 20th molecules in a room and their interactions f=rm a HUGE data base space, is moronic. we can meas=re temp and pressure , energy equivalents etc but that is physics. =C2 so far we dont have many or possibly even any , equivalence=ts to laws of living systems. . money will not make that=easier finding smart , unique minds, possible will. =A0
