As I am starting putting the permit doc=ments together for the cable, I started thinking it would not hurt to go a=ead and permit a second route between GSJ and LSJ right now while we are d=ing this. We don't have to install it, but we would have it in o=r back pocket so to speak for 5 years with the COE without even extending =nd 1 year with CZM that could easily be extended for 3-5 years. It w=n't cost anymore through the permit process.

What does everyone think?
