Subject: Fwd: Caribbean property underwater cable

I connected yesterday with Marmon. Based on facts presented below I was told verbally that rough approximate cost was \$50 per foot. In order to formalize quote they need more info such as amp= voltage and some additional info from wapa. Not sure if you want to move a=ong further at this point or wait. In addition they are asking for name of i=land and timing. Please advise if ok to provide info. Thank you.

Rich-Can you give me the name of the island that the cable will feed so w= can estimate the route? Also what is the timing of this project. That is i=portant when estimating.

Ed

It was nice talking with you earlier. Fa=ts are as follows:

- 1) 9000 feet of 15kv 3 p=ase underwater cable needed
- 2) transformer will be approxim=tely 300 kW

Please advise what other info y=u need to provide material pricing in addition to install costs.

Thank you

Rich
