Hi!

My friend Nick Kovarsky, we met with Peter Thiel =ith the help of you, is going to be in NY and SF from 14th till 20th of Fe=ruary.

Unfortunately I can not come with him.

<=iv>

Is it possible to create his meeting with Vincenzo?

1= the devil is in the details, meaning that even if in theory it's all solid the implementation might have bugs. There's no definitive technical solution for that though

2) anything that=is "custom" (eg: they have a custom wifi protocol) is a red flag=because it means that it hasn't been properly vetted and might be broken/buggy

3) there aren't enough details online to tell but it seems to me that to speed up the blockchain verification they partially centralize the network by using their own "supernodes" (essentially the wallets talk to the supernodes vs the actual blockchain). The security of those servers seems key to me and they gloss over =online

4) the mesh network implementation is completely up in the air (judging from what's public) and it could go horribly wrong. So that needs further verification

<=iv>Also (5), in general the disadvantage of distributed /open things is that it is a lot easier to steal money vs a closed network (like swift).

Are you looking to invest into this thing? If so ♦=A0, I'd suggest a few things:

A) because problem (1) above is not completely solvable, they need to have a plan. Part of it is technical (do continuous code auditing, pentesting, onboard proper crypto people, etc), the other part is legal/financial and specifically they should have some kind of insurance and they should have a disaster recovery plan. A big disadvantage of decentralized system is that you don't have anybody to trust and you don't have a closed network that can make stealing money hard, they need to address that

B) realistically nobody is going to attack them until they become significant enough from a financial standpoint. This gives them time to work on A. That said they should avoid making enemies (the "isgruntled" hacker type)

Hope this is useful, if you get more stuff from them I'm happy to look into it more.=Also if you do invest I can help them with (A) if needed.

=br>

It's a very dumb platitude but "security is a process" is true.

Unrelated: checkout edge.org, I think you'll like it.

There's a short video with Minsky that is absolutely fantastic
