Hi Everyone,

Just wanted to send =his quick summary of what we spoke on the phone and fill in Omar and =lyster. This project is to extend the Internal (private) network =f Little St James Island to Great St James Island and interconnect the =buildings on Great St James.

This is a quick outline.

Little St James:

Evaluate current tower for installation and hardware needed – Choice

Great St James Site survey - Choice:

Dragonwave backhaul

- * coordinate of location
- * Type of mount needed
- * Cable Run needed
- * Cable access needed to building.

Wifi links:

- * Interconnecting buildings
- * Identify coverage areas needed
- * Type of mounts and hardware needed

Acquisition of equipment:

Dragonwave - ?

WiFi units - LSJ

Microwave coordination --LSJ

Alyster – lets plan for this survey Monday or Tuesday. As of right now Wednesday and Thursday there might be some rain in the forecast. The plan could be (if possible) Great St James first and then Little St James.
