Army Corp= called late this morning and said that enforcement has decided to hold up=the VIWAPA cable project because of the LSJ non-compliance issues. A=my Corps suggested that we removed the LSJ-GSJ cable so the ca=le system can move ahead.

I ended up talking with Jonathon Pempek as well as Sindulfo Cast=lo and they said although it is unusual to hold up a project that the app=icant was not the violator on they felt this was good leverage.

So Jonathon said get the barge ramp= out and pull the fill material back out around the wetland near the point=closest to LSJ. I am waiting on old wetland delineation from Ryan Wi=ehart so I can mark it and we can get the material moved back a couple of =eet and plant a few mangroves.

Jonathon suggest that if you really want one of the barge ram=s we could pull it out and then ask for a permit for it.

He stressed that he wants you to get all=the things you want but we have to go through the permit process.
