Jeff=ey  
Boeing in Palm beach now,.  
Aux Boost pumps operate normal in ground,.  
There 2 in fwd aux tank and 2 in rear aux tank,  
In flight we can operate any one pump to transfer aux fuel, but when selecting both pumps on at same time, we  
get low psi light,  
We are better than before, but still have work,. I'll speak with Neil a= Banyan plus Morrison to continued trouble  
shooting,.  
Stambaugh avionics assisted, so banyan should be able to work with quite wi=g to address our issue in depth

Thx  
Larry
