Subject: Re: Cattle futures

Retrospectively allocating successful trades to the accounts of favoured clients is known as "rat trading", and it was rife in the US commodity markets of the 1970s. Indeed, Clinton's broker, Refco, got a record \$250,000 fine in 1979 after it emerged that its Arkansas office had tampered with time stamps to allocate trades to customer accounts only after the market had closed.
