Subject: TCAS upgrade required B727

Jeffrey,
Europe airspace is requiring to have TCAS 7.1 software installed by Jan 1st, 2016 for the B727.

=/div>
U.S. Airspace is not required to have TCAS 7.1 until year 2020.

Cost for software upgrade to 7.1 TCAS is \$60,511 (due to age and Mod status of B727 TCAS unit, we have to upgrade our box=before 7.1 software could be installed).

We have 7.1 TCAS already installed in GIV, when we upgraded to DU885.

I will have another price quote on Monday from Banyan Avionics Fort Lauderdale.

Boca Aircraft Mx=quote is \$60,511.00

\$47,000.00

Labor \$436.00

=p class="MsoNormal" style="margin: 0in 0in 0.0001pt;">>

About 3-4 four hours are required to do the work and paperwork.

=/o:p>

So if you exchange it, you are looking at \$60,511 plus shipping.

Feel free to ring me if you have any questions=

<=p>
