To confirm,

The goal is to have Gulfstream re-veneer the Pocket door, so it hides any o=enings such as Vacant/Occupied and T Handle,. If Gulfstream can make the P=cket door look like Eric's one in the photo below, and Maybe Plate=or stain the door handle to match the Dark Eucalyptus veneer,

The goal is to have the Pocket door as much veneer as possible, camouflage =he handle,? I'll request a drawing for your approval.

Original Eric fabric panels, Note the fabric panel to cover the monitor is =external, a bit bulky?

Note, the monitor below is almost same color as veneer with no power, Eric =ill have to move the monitor fwd to make a gap for the Veneer cover to sli=e up from behind,,, or do you prefer a sliding door in Veneer with the sli=es external as he did in the photo above? Just some thoughts.
