thought.: =A0 Is the single individual and brain the wrong boundary constraint. =A0. do you need two brains. to describe the system. humans a=e transmitters as well as receptors. Why does solitary confi=ement have such a strong effect. It breaks the system, = the feedback loop is no more. . we smell but we also stink, =C2 we hear but we also make sounds. etc. we can thin= about what the eyes transmit.

=/div>--

=C2 please note
