**Subject:** Paris Wx update

Jeffrey

You are correct, London is experiencing thick fog, temperature and Dew point=are equal at 50 degrees / 50 dewpoint., currently London 100 overcast with 1=4 mile vis., Paris is currently reporting 500 overcast with 3mile Vis., at 6pm Paris time=, My Paris handler/ Pilot indicates this is normal for November in Paris, Temp=is 46 degrees and dew point 48. This is formula for fog. Best Paris arrival=is noon until 5pm in Paris.,  
I'll have better forecast at 8pm tonight from Universal.

-ILS approach for runway 07 LeBorget takes me down to 320' which is runway i= use, due to wind, but has 100' hill/Obstacle located at runway threshold. =20 -Runway 27 ILS has 200' minimum on approach, no obstacle present for this r=nway, but not favorable wind direction,, Wind is out of the east at 07kts.,

Thx  
Larry
