cells signal each other by various means. =. chemical gas . electrical, . , multicellular =A0 other chemicals. wider range of signals.

some sigals =A0 internal some external. . why is not " language =erely a signal for internal use . organ to organ, sense to sen=e. the eyes telling nose where to turn. etc. . and then it get= vocalized for external signalling as part of a repertoire. gesture =rosody etc. is there a universal vocalization , =A0 OW for example, when pain sensors engage? and vocaliz= as a by product of the info transfer. . I love to=see how your wife takes care of you. great great great
