Hi Jeffrey,

just to wish you shana tova,

Concerning the centers, there is the possibility to charge the cost of the buildings in Bahamas to the Lyfords Kay Foundation, that can support big projects, you could be in charge of supporting people.

There is also the possibility of starting a center of theoretical physics in Israel, in Mitzpeh Ramon, a town a little bit south of Beer Sheva, the municipality is ready to make available some buildings that already exist, we will know more in early October, again you could be in charge of supporting people. In Israel is not hard to find physicists

If you want, the two projects could be part of the same initiative, different campuses of the same institution, like people can be paid from Bahamas (no need to pay taxes there, so money goes further) and visit both Bahamas and Israel you may consider best regards, Eduardo conversation-id 104756 date-last-viewed 0 date-received 1442139482 flags 8590195713 gmail-label-ids 6 2 remote-id 541862
