Is the boss logging in with the new use id and password [REDACTED] .. Can you login  
home.nest.com <http://home.n=st.com> ?

James= any thoughts on this???

I am connecting both on l=ptop and phone.

Regards  
J Ruan

For his iPhone / iPad, he'll need to install the Nest app by Nest Labs — <https://appsto.re/us/3QYTB.i<=a>> and then sign in with these credentials:

=div class="h5">

u: [REDACTED]

p: [REDACTED]

The camera will show up on the main screen.

For the laptop, he can login at =<https://home.nest.com/login> <<https://home.nest.com/login>> with the same credentials and the camera will show up on=the main page there (requires flashplayer, btw).

<=r>

BTW: We can run as-is right now and see live video or we can add a "Nest Aware" subscription and have it save 10-days (or 3=days) of video history online. 10-day is \$100/year; 30-day is \$300/year.</=iv>

Jermaine,<=div>

Once you've gotten the power resolved, can y=u please take screenshots on your phone (press home and power button at the=same time) of the three best camera angles for the boss to chose from?

The notifications don't go to the email address=— only to the iOS apps logged in with the account info — so=it doesn't really matter which email address we use for the account= \*But whatever address we use will need to be "verified" when we se= it up.\*

Activ=ty notifications go to the iPhones/iPads logged into the account. Rich's em=il is the registration for the billing of the subscription.

[REDACTED] > wrote:

Hi Jerm=ine,

I just checked in on the N=st the app and see that the camera still isn't online, so I'=e removed it from the account to make it easy for you to re-add it.

The next time you have a chance, pleas= follow these steps:

1. Download and install the Nest app, and log i= with the previous credentials if you haven't already
2. When you're where the camera will=be finally located, make sure your iPhone is on the island wifi network and=open the Nest app.
3. Click th= "+" / Add button and select Nest Cam from the list of devi=es
4. Scan the QR code on the b=ck of the camera and follow the instructions to bind the camera to the acco=nt.
5. If prompted enter the U=VI zip code (it only determines the weather displayed on the home screen) a=d name the camera "Dock" or something similarly identifiabl=.
6. Once that's=done, you should be able to view the camera. Give a shout and I'll c=nfirm we can see it here.

Scre=ns...

The camera is set to dynamic addressing. You will likely have to remove it from the account and read it via the QR code on the back of the camera.
