Like I said I need to see the seat.. It seems that =t needs adjusting. The seat was assembled from scratch. This was almost =n impossible thing we made possible as you know.. so if there are some =djustments then we can make them. The seat is a oem seat and From the =ealer in parts. I will find the paperwork to show you the amount of =arts.. I would like you to call the dealers to verify.. The best = can do at this point is try to adjust what I can to remove the saggy =reas.. Nothing else can be done. I really think this a minor =ssue and for me to do anything I need to inspect seat
