Subject: Sound System

<=>Date: July 9, 2015 at 12:24:29 PM EDT

Hello Rich, So the Sound system in the Truck can be Dia=ed in and tuned. There is a break in period for that . We usually expect 2=weeks for the customer to come back for a final tune. This will increase t=e Volume and bass quite a bit. Whatever we have to do to make him happy wi=h the sound should not be an issue at all. We do need some input on what h= thinks is lacking.. EXAMPLE. More low end, More midrange ETC. Also not su=e which radio he is using. There is a black button to switch between front=radio/rear radio. Also you can adjust the system by the black knob it ♦=A0has two ways.. I think it's more that he does not know how to us= the new sound system or adjust things to his ear. It would be best for us=to gather more info and or show him in person .

We♦=A0 took the approach of a stealth system keeping everything like factory. =his actually takes more work to achieve. Because of lack space it'= more of a challenge. Below is a list of the items installed =u>

1.=span style="font:7.0pt "Times New Roman""> =C2♦ Front speakers are Alpine Spr-60C =/p>

2.♦=A0 Rear speakers Are Alpine Spr-60C<=>

3. Amps For front rear Pd=-F6

4. Amp For Sub Pdx-M=

5. A=dio Control LC8I Processor

6. <=span>Alpine CDE-149BT radio rear

7. =/span>Jlaudio 10w-T3 slim subwoofer tucked away on left corner behi=d factory panel

8. RCA p=ugs By stinger

9. Stinge= Power cable/Fuses/wire

10. 20 plus hours =f labor to make custom radio panel/wire/install speakers/x-overs/sound Tun=

11. 5 sheets of acoustic sound damping by=STP

12. Audio Switcher

=p>13. =C2◆ custom made sub enclosure to be stealth Fabricated in =ouse

=/u>

We will do what it take to tu=e and adjust to his Ear and or replace equipment if needed.. =u>
