Greetings Sir,

I contacted Jaredian =o confirm that the scope of work they submitted for the structural steel b=ildings they designed for the RO Garage roof and the proposed New Mechanic=I Building were suitable for the 80 by 80 building that you have requested=bids for.

John advised that an 80 foot wide building would not fit on the =eight - we presumed you are proposing to place this building where the curr=nt Buck Steel building sits - due to space restrictions.

The building th=y designed has a maximum width of 74 feet. To increase to 80 feet yo= would have to excavate into the driveway leading to the Iguana crossing a=d to your Main compound driveway. They avoided this area because of =he electrical and other underground infrastructure that runs under that dr=veway.

Do you wish for me to proceed, as you requested, with obtaining quo=es for an 80 by 80, or do you wish to reduce to 74 by 80?

Respectfully, =C2 Daphne
