i spoke with Stefano and he said the Apline system installed =s the top of the line radio they make he installed the =53BT so that you would have USB and Aux inputs but if you prefer he can =wap out for 149BT (which was in his email earlier)

below he says subs are =00 watts

stefano asked if you could come by shop so he can walk you =hru system and make any changes you would like

please advise  
thank =ou

The specs are here =bove the difference can be changed on bill... We had =hanged it so he could access the front inputs. You have AUX and USB and =luetooth. The cde 149bt just has them from back that needs to be ran =omewhere to plug in.. We change it out easy.. plug and play.. whatever =akes him happy we will change it too.
