Dear Misha,

We met some time ago in Princeton at the Institute for Advanced Study.
I have since then moved to Harvard, where I am studying the
mathematics of evolution.

Many people here are very interested in your work.

Would you like visit some time? Maybe also visit that Harvard and MIT
math departments at the same time?

I also have a philanthropist friend, Jeffrey Epstein, who would love
to meet you.
He could also cover your expenses.

Best wishes
Martin
