**Subject:** Barge return - June 19, 2015

Greetings Sir,

The realistic date for the return of Big N is Friday, July 31.

We spoke with Gene this morning (Gene spoke with Boscoe last night) who summarized for us the parts to be completed before the barge is ready for sea trials:

Old engines removed and stored

Engine parts swapped from old engines to new ones New engines set in place (old engines loaded for return) Alignment Exhaust system Wiring to the new engines Recondition the transmission Replace the fuel lines Recondition the fuel filters Sea trials

Gene does not foresee any catastrophic setbacks, but at this time he also does not see the completion before the end of July.

When we speak with Toyson on Monday, I will request their barge for the mobilization of Better-Roads equipment, and that they work with us as auxiliary until Big N's return, so this project's schedule is not derailed.

Respectfully, Daphne
