I will take your word that you share my thick skin for cri=icism and share a strange pleasure in learning, even if it means having to acce=t that some formerly closely held beliefs might need strong correction. I have no particular knowledge re politics or=history, so I will never offer an opinion. however re mathematics and or=money , I feel on strong ground. That being said, thought puzzle= in the paper are brilliant and insightful. the mathematical descriptio=s lack rigor , and the metaphors suffer from the common science limitation =f trying to describe things using the engineering metaphors or the tools of the moment.ex. The human or its brain as a computer .= set theory . It was popular in the early 20th as you know to describe the body =s an electric machine.. the mathematics used today in quan=um show more promise , as it attempts to describe things that appear counter intuitive. or difficult to comprehend , ( your displacement conjecture) =AO your simple X and Y , Merge , is quite naive and unfort=nately incorrect.

.  
2. from the paper you sent. ;=C2 a much more elegant way of conveying what i had failed to do r= sentences and money

European structuralism commonly adopted the Sa=ssurean conception of language ( =ONEY) =/span>(in the relevant sense) as a social entity; as Saussure put it, a st=rehouse of word images ( values )=/span> in the brains of a collectivity of individuals founded on a =9Csort of contract."
