Subject: Interior designers

The Italian decorators I know are Federico Forque= who did most of the Agnelli houses and Batman's in Paris and R=nzo Mongiardino who was really well known but he is dead now!! Ilar=a Miani she is also very popular and more contemporary and does most o= the houses in Toscany and also in Venice. She is very good with the light=ing and to link interiors with nature so I think it could be interesting f=r the island. I can ask around to people I know if they can give me more n=mes.
