Subject: Re:

this is what I've sent Chomsky today, we have been going at language and money for hours every day,

AI= Biology is composed of redundant and degenerative systems. fractalized to a degree.i.e. single cell , multi cell. organisms etc. The =ingle cell subordinating its description in the description of the whole. Both you and I agree that all mathematical models fall far short of getting to the essence of life- most have tried. I propose that your UG , I- language, is just one of many " cells " in the =system. There is likely a VG for vision.(the input part can be ignored) and and a CG=20 for cognition.(shared in some similar form by other animals). Nothing really meaningful to date has been said about how any one of these=20 "cells" ,nor in fact any living system, accomplishes what it does. UG=/span> included . While the UG is found only in humans Are =he structures of UG- VG- CG homologous? probably , more likely than not - as they =ould have evolved all being embedded in the same local e=vironment. In keeping with biology's redundancy they may have also =ried many combinations in attempting to form into a UVC-G organism . (turtles all the way down). CG, VG and=C2 UG are parts of a living system. All their well kept secrets of operation - still=20 safe.

I'm afraid your cries against subsidies ,is akin the blind man feeling the tail of the elephant. . I will set aside my caustic jewish side and present it in suffi terms .

"The sensual eye is just like the palm of=the hand. The palm has not the means of covering the whole of the beast.&q=ot; sweet ? <http://en.wikipedia.org/wiki/Blind_men_and_an_elephant#cite_note-Rumi-10>

The difficulty is the essence of money. what is it? It is nothing more than an accounting means. this is constantly overlooked . ex, we " loan " Israel " three billion dollars a year " . with=that loan they must use it to buy U.S. military equipment. or Boe=ngs. we record the transaction as a sale of us goods to a foreign country , alongside every other export.. increasing and puffing up our =alance of trade numbers . all a fiction. we print the mo=ey, loan it out and account for it as income. - at the same time we pro=ibit direct subsidies of Airbus by the EU. as a violation of the agr=ements of fair trade.

2ex . we pay 1million soldier salaries. out=of the defense budget . a standing army that plays war games for most of the past 50 years. trains for battles that are never actualized . we could not do it as a welfare=20 payment , but the accounting would make it virtually imposs
