Ive have for many years asked the wrong questio=.   I had asked if Life is the solution , ? what is =he question. .   it is apparent to me now that=the question follows a misguided computational model. WRONG.=C2

 i think that Life is a process of processes of p=ocesses. .... it is not a solution at all. . in cat the=ry its called functors. . functions on functions. each r=presented by prob p . an n dimensional map. . some shapes in the map=are coherent. defining a system. systems interact, intersect, =erge etc.   entropy being the sum of log p P .
