Anna.

=They had one man on this today. He did well and he is scheduled to work through the carnival thing as well as more assigned tomorrow I'm told. <=r> SBDD is concerned there is similar corrosion behind the rubb=r on both sides (port and starboard) as well. They will investigate that as=the project continues. I have removed some of that before and all was well b=neath.... I am hopeful this will be as well.

Any news about adding the pumps, pulleys and pump drive parts ins=allation to Jays list??
