I've been surprised how many corporations are looking for a=new military like perspective on mgmt. I think that as in the past corporations were focused on stockholders only, and maximizing profits. they are now focused on stakeholders. . though= community, the employees. the suppliers. Frankly = that is much more a military point of view. , and the military need= to be more usulally corporate focus on cost benefits. =A0 Security is now a concern, cyber security of course .=C2 sercurity of their brand their personal and their information. =C2 I have been fortunate to be shown opportunities to run major co.s. =A0 and of course sit on their boards. I enjoy strategy, and strategic planning, and at the same time am AMAZED by the rate of which=technology has moved into the private sector. We of course hav= had a technological focus in israel for many years. mostly computation.=C2 now biology and its genetic advances are changing the landscape fast=r than most can imagine. I feel privleged to be able to contribute some Old methods to NEw industry

What are you doing nowadays. =A0 1. I'm trying to decide on the best way to serve . =A0 I have been asked to SHARE my experiences with some very large corporation , that translate into running major organizations with many moving pieces. critical mission statements . a formalized hierarchy , At the moment large corporations are focused on not only on the security of profits. but on the security of their cybersystems, personnel and protecting themselves from attack. A corporation is not dissimilar from the defense forces.. many moving pieces, divisions, org chart, and the intelligence network that military has used in the past to separate =A0 data from actional info.
