Subject: UPDATE

Dear Jeffrey,

I and Thom Curtright from the University=of Miami, visited Long Island in the Bahamas, for the purpose of look=ng for possible sites for the Center for Physics we were planned. We were =ery impressed by the beauty of the place.

We identified possible sites for the Cen=er for Physics one of the sites is conveniently located close to the resor= of Stella Maris. Locating the people visiting the Center in such resort c=uld be a possibility.

By the way, I was told that the resort o= Stella Maris is now for sale, but the owner wants only a selected nu=ber of people to know about this and I was told I could tell you, in case =ou were interested, contact Richard Keyworth email rich.keyworth@psgbahamas.com <mailto:rich.keyworth@psgbahamas.c=m>

I and Thom Curtright from the University=of Miami plan to visit again sometime in May and thought you may perhaps j=in us, then you could tell us what should be the direction we should take&=bsp;;

Also, Thom and I had the idea of or=anizing a conference in the resort of Stella Maris in the middle of =anuary 2016 tentatively, which could be the first activity of the center, =ven before any building is built, do you like this idea ?
