Updated test flight
1-Tonight and Friday, Gulfstream is working the HUD/EVS issue,.it doesn =99t power up, Both HUD and EVS are inop.
2-today, we had to change the oxygen Control box in the cockpit which houses=the O2 test unit,, when testing the unit, it failed due to an oxygen leak, t=ey use a Pitot Static test box, and pump of the BOX to simulate the Cabin A=titude reaching 10,000 for the O2 masks to drop in passenger compartment,,,=this part cost $36k and is installed already,, Pete and I will shop this pr=ce to confirm its a valid price,,, if we locate a lower cost unit, I will m=ke Gulfsteam match the price, I'm not sure if I'll locate t=is part, other than Gulfstream ,,, I will try.,. I was disappointed this fa=led the test, since the unit only leaks when tested,, NOT in normal mode of=operation, a leak, could mean, late delivery of Passenger Compartment mask d=op 3-Interior shop is buffing scratches we found during interior veneer inspect=on., 4-Cabin door to rear LAV does not clothes in flight, 5-VIP switch panel cover, hard to open in flight 6-SATPhone would not make call, this is a aircraft programming issue since w= switched to Arinc for WIFI and SATPhone and DATA link.

The plane could be finished tomorrow,. Maybe Saturday., After gulfstream receives payment, should i fly the plane to Islip and park i=? I can get hanger space starting Monday in Islip only., I will also conta=t Permaguard in Miami to see if they can start application in Palm Beach ne=t week, Palm Beach quoted $5800 for Teflon application,, Savannah quoted $7=00 I'm sure i can get a lower quote for Permagaurd in West Palm bch as w=ll, i will have that price tomorrow.

Pls advise when and where you want me to fly the G550 when completed?

Thx
Larry
