Subject: close to third rail

Jeffrey-as u know, most of the items listed by you are in =he works--initiated by me (not you) for the very reason you allude to....the need for ACCURATE records. Record keeping--in an office essentially run by you for 18 months by remote control--is a disaster. Sorry its taking more time to get it right than you would like...

With respect to my basic question--setting up a meeting to discuss "3r= rail" issues...this is abt my 8th request. I thgt a simple: "yes,=let's do it" would suffice. I'll keep asking; you can keep deflecting...=
