Iridium Upgrades Starting at \$9,999
Limited Time Only

Limited Time Offer
Reduced Prices for February

CHiiMP is a narrowband solution which connects via IRIDIUM satellite network, providing Global SMS and Text Email capability for your Apple mobile devices. CHiiMP also features GETMAIL, the ability to check your own i=box headers and upload those emails that are important to you. CHiiMP has been designed to comply with the latest EASA and FAA regulations in regard to operations of Portable Electronic Devices (PEDS). CHiiMP's Microcell is classified as a "PED" and designed to be stowed in a certified mount, connected via a certified power source and interfaced to an existing Iridium data port. Once powered up it creates a Bluetooth Network on the aircraft, so passengers and crew with the CHiiMP App on their iOS device can connect.
