Subject: sonos

during my meeting with bill m

I began to understand your frustration with the system performance of =he

the network at LSJ because my advise to put you on unmanaged switches =as simple as it gets) was never agreed to... trumped by the thinking =he your voip would some how be overwhelmed and some fear of unmanaged =iber ?? (i still think for your request for easy of use ... i stand =y my advise)

so you have allot of sonos gear that I think would work better at 71st =hen LSJ ... maybe you want to chuck it all i dont know

I think a brief trip to lsj me bill and jermaine each at the end =eporting to you as a team with debate would be of great value to you

anyway thank you for introduction me to the technology I use myself and = now install and support the system

you have been brilliant at training me to help you better (tho the =hort email i need more training on)

I want to view the difficulty on building your system on 6 and finally =elivering the simple smart house you have been screaming for

thank you so much again

scott
