Dear Brice:

Good evening.

It was a pleasure speaking with you yesterday =fternoon. Glad to hear you are back in LSJ.

Here is an update on the following items along with =omentaries.

PALM TREES:

* Confirmation=on inventory of 17' Clear Bare Trunk Coconut Palm trees was delayed due =o the fact that our colleague Mr. Clemente Perez who owns the Palm =rees 40 acres nursery and who also is the person Pedro and I are =ecommending for the Landscaping Design and maintenance program, =uffered a severe event of the Flu as well as due to the constant heavy =ains we have been facing in Puerto Rico for the past few =eeks.

* Today I spoke with Mr. =érez and he will provide us with the Coconut Palm tree inventory =or us within the next 48 hours (Commencing Tomorrow) for he wishes to =resent us with an accurate inventory on the palm tree sizes for your =valuation. Meaning that our team will be able to present you with palm = pricing structure by latest Friday afternoon.

HEAVY EQUIPMENT REQUEST:

* Pedro is working directly with the Caterpillar =istributor in Puerto Pico to obtain pricing info on the equipment and =e has been facing delays in obtaining estimate.

* As far as my efforts are concerned regarding =he equipment, I also have been experiencing delays in obtaining =stimates from my first suppliers options. I raised some hell with them =oday and I should have their response by tomorrow.

* Currently I am working with other heavy equipment suppliers =span style="font-family: verdana, helvetica, sans-serif; font-size: =6px;" class="">in Puerto Rico, the US and Tortola that =epresent Caterpillar as well as with other distributors from JLG, Bob Cat & John Deer to name a =ew in order to present as options for evaluation. By =omorrow afternoon I will be able to have info in order to present to =ur team members for evaluation.

CEMENT, AGGREGATES & MOBILE BATCHING PLANT =OGISTICS:

* Cement, =gggregates, Cement Additives as well as Barge Loading Operations =ogistics in Puerto Rico are in place and ready to go. All I require is =or you to provide us with the depth survey at both pre identified =ocations in GSJ.

* For the =ast weeks I have been searching for Concrete mobile units in PR and US =s well.

* I have =arrowed search and identified 2 Mobile batching Plants in PR which I =ill inspect in the following day. From my preliminary evaluation, =hey look in good shape.

PALM TREES & HEAVY EQUIPMENT SHIPPING =OGISTICS.

Brice, we would like =our feedback on the following subjects:

* My current short term shipping logistics plans =all for shipping goods from Puerto Rico to St.Thomas and for your team =ave goods picked up with your supply vessel to deliver to LSJ & =SJ

* My long term logistics plans =all for delivering goods via Tug & Barge directly to Greater St =ames were we can set up a "Staging Operations Area" at either landing =ocations optioned you suggested (Sand, stone, cement, Palm Trees, Heavy =quipment, etc.) and then having goods picked up with your supply vessel =n GSJ and transporting them Little St James.

* Shipping Logistics for 40' Flat Racks from Puerto Rico to St. =homas for palm Trees and construction materials and equipments are =onfirmed and in place as we speak as well.

* Once you approve heavy equipment =urchase, we'll provide you with the landed prices into St. =homas.

Brice, I need for you to kindly provide mw with the following =nfo ASAP:

* Your shipping agent in St. =homas contact information.

* Please remember that I urgently require Depth =hart Survey at either discharging options in Grater St. James in order =o determine width maneuvering area, 100' out to sea from shore =ine.

* Your =on water content in order to finalise concrete mix =esigns.

* There are various =pecies of Ficus. Please clarify which species you wish for us to =uote.

* Attached please find some =otos of the 3 gal. Bougainvilleas pots. They do not look "Too Hot" =ight know, it's just that they have been taking a pounding by the =onstant rains we have been facing for the past weeks. Having said this, =ith a week or two of sunshine, they will regain their strenght and =osture. By the way, the 200 Bougainvilleas are currently in =tock.

Very important! It is imperative that I =long with Tug & Barge owner fly over to GSJ with barge owner for a =ersonal inspection of both pre identified discharging locations soon as =ossible in order to weed out any current unpredicted variables. please =advise as to what dates are good for us to fly over with Barge =wner.

It =ould also be a good opportunity to fly Clemente along with us so that =e may personally inspect the grounds and have a better idea as to =andscaping area needs and for him to evaluate any plague control work =hat may need to be implemented.

Please advise ASAP as to when it's more =onvenient for you for us to visit LSJ.

Looking forward to your prompt reply, =e cordially remain.

Comments, suggestions and criticisms are and always be =elcomed!!

Regards;

Armando Vilanova
