Subject: Google Earth Image

Google Earth streams the world over wired and wireless networks =nabling users to virtually go anywhere on the planet and see places in =photographic detail. This is not like any map you have ever =een. This is a 3D model of the real world, based on real =atellite images combined with maps, guides to restaurants, hotels, =ntertainment, businesses and more. You can zoom from space to =treet level instantly and then pan or jump from place to place, city to =ity, even country to country.

Get Google Earth. Put the =world in perspective.
