Hello Jeffrey,

I have been working with deJongh architects on the master bathroom add=tion and prepared a sketch to help them configure the addition to match th= sketch from Pinto and have talked them thorugh the design. DeJongh arc=itects will issue the building department documents next week for review a=d issuance to the building department for filing.

I have been working with Gensler Group to further the design developme=t of the existing house, especially the column and cornice design so that =he deJongh architects can incorporate these details onto the master bathro=m extension of the porches.

I have (finally) received the dimensiions of the painted canvas cei=ing panel for the office building ceiling from Andre at JPM studio and =m completing the ceiling layout drawing to be issued to the field for layo=t.

I have been reviewing the revised budgets for the mechanical building.=A0 The exact scope of the additions needs to be carefully considered for e=ch stage of expansion and extension.

I am sending to Brice (with a copy to Richard Barnett) options for gen=rators in Palm Beach taking into account town regulations. Including th= costs by Owner I think the overall cost will be about \$ 125 K. Brice and = have just had a long conversation about this.

I've been organizing and finalizing reimbursbles, a task that I do='t like to do and keep putting off. I'm an architect, not an accou=tant.

My very best regards, Douglas
