Subject: Superion Minimally Invasive Surgery

Just saw a 77yF who is having the minimally-invasive proce=ure next week - she brought a pamphlet with her. It looks like that proced=re is easy-peasy, hardly "surgery" FYI - they put a spacer betwe=n the posterior spinous processes of your two vertebra that are compressin= your nerves and causing neurogenic claudication when you hit the red mark=on 67th Stxxx
