Subject: Headset hook posi=ions

Larry,

I just had a discussion with Eric Roth regarding the headset hook locations a=d I wanted to give you a little better understanding of how the headset hooks w=re positioned.

Please reference the attached image for a hook layout in the aft divan seat positi=n.

<<Headset Hook location im=ge.jpg>>

We positioned them based on the following. We started with a 12" armrest =nd then took a width dimension for the passenger area on the LH and RH sides o= the fold down armrest. We then located the center point where each passenger's head would be and then centered the headset hooks on both sides of the passenger center point. I hope this makes since, it's a little clearer =n the attached image.

If JE would still like to reposition the headset hooks, it would be helpful to print out the View Fwd and View Aft renderings and draw on the positions an= then fwd the images to us. We can then update the renderings for JE's r=view and approval.

Thank you for the response regarding the paint. You can fax your approvals to: ██████████

Regards,
