Jeffrey,
update:
-they are installing another amp for Bass in headphones, should fix th=s problem.
-They are recovering the ceiling headliner do to finger print indentat=ons I noticed, does not effect the acoustics.

only outstanding item is volume for I-Touch,
they have proposed a small volume knob to be located under I-Touch cradle.

-I will make some calls tomorrow and see if we can make the I-Touch volume work directly on the I-Touch rather than installing this=20 knob. We have limited volume range on the Bose headset, only Medium to High=for listening, which is OK,.. Keystone engineering is unable to do this due t= certification issues with FAA.

would you prefer the knob? or wait till after delivery and use this as=20 bargaining tool ?

I will have more info tomorrow.
at this time Chris said Monday it will be ready, with Bass fixed and v=lume knob if you choose. FYI

thanks,
Larry
