UCLA STUDY (very=20 interesting and short)

A study worth sharing with friends both male and female:

A study conducted by UCLA's Department of Psychiatry has revealed that the kind of face a woman finds attractive=20 on a man can differ depending on where she is in her menstrual cycle. For example: if she is ovulating, she is attracted to men with rugged=20 and masculine features. However, if she is menstruating or menopausal,=20 she tends to be more attracted to a man with duct tape over his mouth and a spear lodged in his chest while he is on fire.

No further studies are expected.
