Dear Jeffrey

It's not that =easy to make your project clear for =everybody.

Plant and us have =orked a lot on the Dining Room, the Main Hall, your Steam room, now the =equest is on the Master Bathroom... With all due respect = we have spent days and weeks with Plant, who are nice people, =ecommended by suppliers and interior designers we know in =Y.

If you think they are =oo expensive I do understand.

We have =lways try to help and give the best quality service to you and as usual =or all our clients the goal was to have an happy and perfect =esult.

In this case, we are =uggesting you to only finish the umbrella and do the decorative =ainting in the dome of your master bathroom. =o:p> As these two points =re the most decorative ones and the less =echnical.

You will =nderstand that the new steam room's area is much too complicated =o take the risk to do it badly with the wrong =ompany.

It is very technical =o build perfectly the waterproofing, the humidity level, the water =ressure, the waterproof lighting and so =n.

You =lways have been a nice client and partner and from my side a =#8220;friend" I should dare to tell but there is a moment I =annot follow you.

I will finish the Umbrella room as soon =s the carpet will be installed and you will tell me when your bathroom =ould be free for the décor on the ceiling (one month will be needed =.

I hope =ou will understand.

With my best =egards

jean
