Hello hello,

How a=e you? What's new?

I haven't=seen you in a while so brief update: sold my company to a company crowdstri=e and now I'm there for a bit. Meanwhile I'm thinking about=what to do next and I'm looking again at insurance linked securitie= partially because I met somebody from scor one of the big reinsurers and t=ey are apparently desperate for solutions in cyber. As an example, this cra=py firm got acquired for 200m+ in less than a year: <https://www.guidewire.com/about-us/news-and-events/press-releases/20171006/guidewire-acquire-cyence> <<https://www.guidewire.com/about-us/news-and-events/press-releases/20171006/guidewire-acquire-cyence>>

So an=way, it seems like credit suisse and bnymellon are both testing the waters:=nbsp;

Do you happen to know anybody there (or even n=t there but that understands these instruments) that I can talk to?

Thank you!
