See below.

Erika Kellerhals (LSJ/GSJ representative) and I did site visits=of both Little St. James and Great St. James yesterday, and it was brought =o our attention that on Great St. James, two temporary barge landings were =reated post hurricane by the staff to assist in the delivery of emergency a=d relief supplies to the island. A significant number of the staff had=their homes destroyed or rendered uninhabitable by the storms and they took=refuge post-hurricane at GSJ. Massive amounts of supplies for these employee=s were brought onto GSJ in the immediate aftermath of the storms. </=:p>

=/o:p>

&nbs=;

One is =ear the location of the proposed new dock across from Little St. James and =ne is in Christmas Cove. Both are rock lined and rubble filled and ex=end approximately 10'-15' off shore. We are aware that these were not=permitted. Despite repeated attempts, the staff were unable reach anyone at=DPNR prior to construction. Mr. Epstein understands that these will n=ed to be removed but was concerned that if they were removed prior to your =rrival that it might be misconstrued that he was trying to hide what was do=e. Should we go head and start their removal or would you prefer to c=nduct the site visit so you can make recommendations of how it should be do=e?
